

## Vacuum Regulator - Venturi Type (Vacuum Generator)

Silbermann's Vacuum Generator is used in medical facilities which lack the appropriate infrastructure required for Vacuum generation.

Based on venturi effect this regulator operates using either Medical Air or Oxygen as input. Generating the required Vacuum pressure for all medical requirements.

Vacuum Generator with probe

Rail mounted Vacuum Generator

### Features & Benefits

- Vacuum gauge scale: 0-760mmHg
- Working Pressure 3.5- 5.5 Bar
- Consumption of gas (Oxygen/ Air) 15-40 LPM
- Generated Vacuum pressure - 550mmHg
- Inlet- 1/8" NPT for male adaptor
- Outlet- Vacuum DISS male outlet
- Vacuum adjusting knob
- Rail mounted Vacuum Generator includes 1 meter flexible medical tubing with probe, and a universal rail clamp

### Silbermann's Quality Management System:

- EN ISO 13485-2016
- ISO 9001-2015
- CE marked

### Catalogue Numbers

Type of Male Adapter	Wall Mounted*			Rail Mounted**		
	Oxygen	Medical Air		Oxygen	Medical Air	
Silbermann-Ohio	4804000	Black-4805000	Yellow-TBD	4810000	Black-4815000	Yellow-TBD
DIN 13260-2	4834000	4835000		4815020	4815010	
1/8 NPT female thread	4801000			4811000		

\* With probe

\*\* Includes 1 meter flexible medical tubing with probe, and a universal clamp.

TBD - Available on request

# Vacuum Regulator - Venturi Type (Vacuum Generator)

Oxygen & Suction  
Therapy

## Assembly: Suction Unit - Venturi Type

The suction unit consists of:

- Vacuum Generator with probe
- Polysulfone overflow safety trap bottle (P.N - 4034000)
- 2 liter polycarbonate collecting bottle (P.N - 4053000)\*
- Collecting jar stainless steel holder (P.N - 4000253)
- 1 meter P.V.C Vacuum hose (P.N - 2118100)
- 2 meter P.V.C Vacuum hose (P.N - 2118200)

Suction unit can be supplied rail mounted or wall/panel mounted.

\* Optional - 2 liter polysulfone collecting bottle

Suction Unit on Hanging Rail including  
2 liter polycarbonate collecting bottle  
P.N - 4843000
