

Portable Pin-Index Pressure Regulator

Silbermann's portable pressure regulator with a pin-index yoke inlet provides a safe, gas-specific connection to the appropriate medical gas cylinder and reduces cylinder pressure to provide a controlled and reliable supply of oxygen or medical air for patient care.

Available with various outlet connection types, including Diss, Sil-Ohio, ENV, DIN German Standard, BS and Puritan Bennett type, to support compatibility with different medical oxygen systems.

This portable regulator is designed for medical use in hospitals, ambulances, clinics and in almost any emergency.

It offers a selectable flow range from 0.5 to 25 lpm, allowing users to adjust delivery according to patients' needs.
